Indian Farmer Information System

NAME: K.MRUNAL

REG NO:12316339

ROLL NO: 58

SDLC Model

Waterfall Model

A linear and sequential approach suitable for stable and well-understood requirements.

Agile Model

An iterative and flexible model ideal for adapting to changing agricultural needs and technological advancements.

1 Requirements Gathering

Agile model allows for continuous feedback,ensuring that farmer's requirements are captured effectively.

2 Development and Testing

Iterative development facilitates quick implementation of features and rapid testing for quality assurance.

3 Deployment and Maintenance

Agile's adaptive nature makes it suitable for evolving farmer need sand ongoing system maintenance.
